---

Dear Sir or Madam:

Are you having difficulty paying for your medications? Do you have to choose between buying your groceries and paying for your medications? Many people do not know this but there are many agencies that will help people who cannot afford to pay for their medications. The government, both state and federal, provides grant money to pharmaceutical companies to assist people who cannot afford to pay for their medications. These programs are called Patient Assistance Programs. These programs provide free medications to low-income people and their families. Many people visit their doctor, pay the bill, but they never fill their prescriptions because they simply cannot afford to pay for both of them.

Our company, Special Patients In Need (S.P.I.N.) was formed in 1999 to help people pay for their medications at a substantial lower cost than what they are currently paying. S.P.I.N. works directly with pharmaceutical companies, American Red Cross, United Way and Division of Family and Children Services (DFCS) to help people who cannot afford to pay for their medications. We are able to provide people with their medications at a fraction of the cost provided that their income falls within the Federal Poverty Guidelines. If you and your family fall within these guidelines, you may qualify to receive a three-months supply of your medications. In some cases pharmaceutical companies will provide an entire years supply of medications instead of a three-months supply. These medications come directly from the pharmaceutical companies.

After you are enrolled with our company, we complete all the necessary documents and applications that are required by the pharmaceutical companies. After these documents have been appropriately completed and signed, we then file them with the appropriate pharmaceutical company. It takes approximately four to six weeks for the medications to be delivered from the pharmaceutical companies to the patient's doctor once the applications and documents have been forwarded to the pharmaceutical companies. After you have received your medications on the initial application, we will reenroll you every three months to keep you current on your medications as long as your income falls within the Federal Poverty Guidelines and your doctor renews your medications.

Just think how much money you could save just by calling our office to see if you qualify! Many of our patients were paying hundreds of dollars a month for their

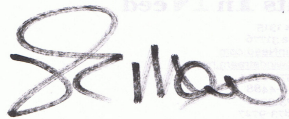

medications before they contacted our company. They are now paying substantially less for their prescriptions.

S.P.I.N has over 300 doctors and hospitals across the nation in our program. We also have thousands of patients all around the country who are saving thousands of dollars a year with our assistance. We have call centers located all around the country.

We also have a new referral system in which you can earn \$10.00 for every person whom you refer to our company. The people whom you refer must sign-up with our company before we can pay you for your referral. In addition, we will pay you a bonus of \$50.00 for every 10 people who signs-up with our company! Just imagine you can earn \$300.00 by simply referring 20 people. Another great thing about our referral system, you don't even have to be a patient of our company for you to refer your friends, family members or acquaintances. You can refer anyone you like!

Call us today to see if you qualify or feel free to contact us if you have any questions. Our Toll Free number is 1-866-572-7944. It would be our privilege helping you with your prescriptions.

Sincerely,

A handwritten signature in black ink, appearing to read "Frank Martin", is written over a faint, light-colored rectangular stamp or watermark.

Frank Martin
